DefiFarms

DefiFarms - The First NFTs Protocol Powerful Automatic Liquidity Acquisition Yield Farm & AMM

Introduction

Introducing DEFIFARMS, the first NFTs Protocol Powerful Automatic Liquidity Acquisition Yield Farm and AMM decentralized exchange running on Binance Smart Chain with lots of unique and creative features that let you earn and win.

Automatic Liquidity

Every transfer made with DEFIY must incur an 8% transfer tax. 6% transfer tax will also be added to the DEFIY-BNB liquidity pool through the contract to automatically and continuously raise the price floor.

Automated Burning

The other 2% transfer tax will be burned immediately. The whole process is automatic.
Black Hole Address:
0x000000000000000000000000000000000000dEaD

Harvest Lockup

Harvest lockup is a unique reward lockup mechanism used to limit the frequency of harvest

Anti Whale

Transfer more than 0.5% of the total supply will be rejected. As the total supply grows, this ratio will be reduced.

DEFIFARMS Ecosystem
